ADDENDUM

THERON W WARD JUDICIAL BUILDING REMODEL AND EXPANSION
427 Shoshone Street North
Twin Falls, ID 83301

Addendum No. 04 Owner Project Number 21403 Date Issued 25 Aug 202

Original documents signed by the Architect, Danielle Weaver, AIA.

1.1 NOTICE TO BIDDERS

- **A.** This Addendum is issued to the Construction Manager. This Addendum serves to clarify, revise and supersede information in the Project Manual, Drawings and previously issued Addenda.
- B. The Bidder shall acknowledge receipt of this Addendum in the appropriate space on the Bid Form.
- C. Responses to Requests for Information:
 - 1. Question: Specification 142400.2.02.A.4 calls out Interior Car Height: As indicated on drawings. I cannot find it shown in the drawings. This is for Hydraulic Elevator 10.201 A/B/C (Staff). Can you please verify the interior car height of the Staff Car?

Response: Final height to be set by the manufacturer - approximately 7'-7"

2. Question: Specification 142400.2.05.D.1-2 calls out to mount a status panel in console as indicated on drawings. I cannot find this in the drawings, can you please clarify if a status is really desired and where they would like it located?

Response: It appears that the monitoring panel is typically located above the door header. The exact placement can be worked out during the submittal process.

3. Question: Based on the information in Addendum 03, are there any bollards associated with Specification Section 323300?

Response: No.

ADDENDUM

4. Question: Does the Waterproofing membrane specified in section 030516 occur under all slabson-grade?

Response: No. Only at the Slab-on-grade in the basement.

5. Question: Section 033000 1.04 B note 9: Is there any steel-fiber reinforcement on this project?

Response: No.

6. Question: Does Specification Section 051200 specify the water stop?

Response: No. Reference 033000, 2.03 for the water stop.

7. Question: What is the minimum STC rating for the Solid Core Wood doors Specified in Section 081416, 2.02, B, 2?

Response: STC 52

8. Question: Specification Section 033000, 3.08, G. Slip Resistive Finish – What product should be used?

Response: SIKA Scofield Traction Additive – a clear coating applied before the sealant which achieves a mildly texture slip resistance surface with minimal change to the appearance.

1.2 REVISIONS TO PREVIOUS ADDENDA

A. Addendum No. 1, Item 1.3, A, 1, A regarding Hardware Sets DH-1, DH-4 and DH-4A and Addendum 03, Item 1.2: Strike these items and utilize the instructions below:

Required functions for a comprehensive holding cell locking system that incorporates slam locking, pneumatic unlocking, and physical key override features. The system will adhere to the following locking controls:

2018 IBC chapter IBC 2018

408.4.1 Remote release. Remote release of locks on doors in a means of egress shall be provided with reliable means of operation, remote from the resident living areas, to release locks on all required doors. In Occupancy Condition 3 or 4, the arrangement, accessibility and security of the release mechanisms required for egress shall be such that with the minimum available staff at any time, the lock mechanisms are capable of being released within 2 minutes.

Exception: Provisions for remote locking and unlocking of occupied rooms in Occupancy Condition 4 are not required provided that not more than 10 locks are necessary to be unlocked in order to move occupants from one smoke compartment to a refuge area within 3 minutes. The opening of necessary locks shall be accomplished with not more than two separate keys.

Pneumatic Unlocking System:

• The system will be operable through a connection to the existing adjacent jail control room.

ADDENDUM

THERON W WARD JUDICIAL BUILDING REMODEL AND EXPANSION

Addendum No. 04

- The locking mechanism's base design will follow AirTeq Airlock 9500 standards for swinging doors.
- The holding cell door will feature a pneumatic locking mechanism.
- Pneumatic actuators will be employed to momentarily disengage the locking mechanism of specific doors.
- RLHB is not required. Per exception for 2018 IBC chapter IBC 2018 408.4.1 (noted above) the detention doors shall be unlocked by staff using keys.
- Status sensors will be integrated to detect and indicate the locked or unlocked state. Local Physical Key Control:
 - The system will include cylinder locks equipped with keyed mechanisms on both sides of the door.
 - All necessary components will be provided to meet the specified requirements.

Slam Lock Mechanism:

- An automatic slam locking mechanism will be implemented.
- The mechanism will be spring-loaded, enabling it to lock automatically upon slamming of the door.
- Adjustability will be incorporated to accommodate various door weights.
- The system will encompass all additional components necessary for fully functional operation.
